Antonis Skarlatos

Web Developer - Data Scientist - Physicist

Profile

A Physics graduate with a MSc in Computer Science and an interest in programming, data science and web development. Problem-solver with attention to detail, analytical thinking and an emphasis on mathematical approach. Flexible and adaptable to new roles and skills. Worked in research and industry fields as a data analyst and programmer for 3 years. Currently working as a Web Developer!

Address Athens, 16232 Greece

Education

2015 – 2020 **Bachelor of Science: Physics**

National and Kapodistrian University of Athens - Athens, Greece
Department of Physics

Undergraduate Thesis **Data Analytics in 5th Generation Mobile Communication Networks**

Description: This thesis examines data traffic in a telecommunication network, diving into 5th generation network concepts, temporal-spatial data dependencies and correlations between network usage and user mobility. Utilizing Python libraries, the study aims to derive insights for network optimization, potentially influencing the adaptation of the 5th generation network to societal demands.

- Supervisors: Anna Tzanakaki, Markos Anastasopoulos

2020 – 2022 **Master of Science: Control and Computing**

National and Kapodistrian University of Athens - Athens, Greece
Department of Physics

Department of Informatics and Telecommunications

Graduate Thesis [User mobility analysis in mobile communication systems]

Description: This thesis utilizes data analytics on a large dataset, employing time and spatial analysis, Gaussian processes, and correlation matrices to uncover user's network usage patterns, predict network needs, and explore correlations with vehicle traffic GPS data. The research aims to enhance telecommunication network performance through actionable insights derived from these methods.

- Supervisors: Anna Tzanakaki, Markos Anastasopoulos

Work Experience

02/2025 - Now **Web Developer**

FactSet

- Working with technologies used in client projects, like Vue.js, Typescript, E2E testing.
- Developing the web application for a big investment bank in Germany. Maintaining code, adding features, performing tests in the code.

01/2023 - 08/2024 **Data Analytics Engineer**

Performance Technologies, Athens

- Official Training and practicing on Tableau, PowerBI, Vertica, MS SQL Server, PostgreSQL, XMLs, Git Version Control, Linux.
- Engagement with projects belonging in the Data Engineering pyramid. Collecting, transforming, cleaning data, using analytics tools (mainly with Python scripts) and visualizing them (Tableau, PowerBI).

11/2021 - 04/2022 **Data Research Analyst**

IASA - Institute of Accelerating Systems and Applications, Athens

- Collaboration with my university professor on data analytics projects for car traffic and train track vibrations for the largest train company in Greece.
- Compiled, cleaned and pre-processed data for proper handling.
- Leveraged mathematical techniques to develop engineering and scientific solutions.
- Presented findings orally and in writing with advanced mathematical models to foreign colleagues from other European Universities.

11/2020 - 08/2021 **Research Associate**

IASA - Institute of Accelerating Systems and Applications, Athens

- Collaborated with my university professor on data analytics

projects for telecommunication problems.
- Gathered, arranged and corrected research data using statistical tools to create representative graphs for presentations.
- Streamlined research processes to meet tight deadlines for multiple projects.

Projects

Freelance Projects

- Orderoo (2/26 – now)
  A white label ordering application for all kinds of stores. Working with a small team of 3 people in a start-up environment to develop this application. Built with React and Next.js.

- Professional accountant web page
  A modern, multilingual website for an accounting professional, built with Next.js and Tailwind CSS.

- Web app for Figata Café shop
  A modern, responsive website for Figata Café - a local café showcasing its atmosphere, products, and unique charm. Built with Next.js.

Skills

Languages	Greek (Native Speaker) English (Certificate of Proficiency, Michigan) German (B1, Basic Communication)
Programming Languages	JavaScript, HTML, CSS, Python, SQL, Java, Bash, C
Technical Skills	Data Structures, Data Analytics, ETL, Data Visualization, Algorithms, Networks, Machine Learning, Graphs, VMs, Version Control, Web Development, RESTful routing
Tools Familiar with	Anaconda (Jupyter Notebooks, JupyterLab, Spyder), Visual Studio Code, MySQL, DBeaver, Tableau, PowerBI, Vertica, Git, VirtualBox, VMWare, Windows, Linux, Bootstrap, Node, Express, Mongo, Mongoose, TypeScript, REACT, NextJS, VueJS, Vite, Webpack
Interpersonal Skills	- Attention to Detail - Problem-Solving - Analytical and Critical Thinking - Training and Development - Flexible and Adaptable
Driving	A, B

License(s)

Certificates

12/2024	Udemy Certificate: Mastering TypeScript – 2024 Edition
11/2024	Udemy Certificate: The Web Developer Bootcamp 2024
03/2023	Udemy Certificate: Advanced SQL, The Ultimate Guide
12/2022	TestDome Certificate: Python

Hobbies and Interests

Computer	Solving algorithmic problems and participating in online competitions. (Competitive Programming)
Others	Music, Cinema, Football, Travelling
